INDOVAR

Chapter 1: The Departure (Airport Goodbye)

Indira Gandhi International Airport par bheed hamesha rehti thi, par aaj ka mahaul kuch alag tha. Ishaan, jo kabhi pichli seat par baithta tha, aaj VIP terminal ke baahar khada tha. Uske haath mein Harvard University ka acceptance letter tha.

"Wahan jaakar humein bhool mat jaana, 'Cyber-God'," Bhuvan ne haste hue kaha, par uski aankhon mein nami thi. Bhuvan ab ISRO mein junior scientist ban chuka tha. Usne Ishaan ko zor se gale lagaya. "Dhyan rakhna chhote. Ab tu sirf mera bhai nahi, poore desh ki umeed hai. Wahan ke log tere dimaag ka fayda uthayenge, par tu unhe apna dil mat dena."

Ishaan muskura diya. "Bhai, mera dil toh ab bhi wahi pichli seat par chhoota hua hai."

Tabhi bheed ko chirte hue Avika samne aayi. Do saal mein wo aur bhi zyada confident lag rahi thi. Uska Manvik se breakup hue ek saal ho chuka tha. Manvik ka arrogance itna badh gaya tha ki wo ek rich business tycoon ki beti ke saath bhag gaya, Avika ko akela chhod kar.

"All the best, Ishaan," Avika ne kaha, uski awaaz thodi kaanp rahi thi. "LinkedIn par update dete rehna... ya phir kabhi-kabhi purane doston ko call bhi kar lena."

Ishaan ne Avika ki aankhon mein dekha. Wahan ek alag izzat thi, shayad thoda regret bhi ki usne Ishaan ko pehle kyun nahi pehchana. "Main call karunga, Avika. scooty kaisi chal rahi hai?"

Avika khilkhila kar hans padi. "Bilkul makkhan! Jao ab, flight miss ho jayegi."

Ishaan boarding gate ki taraf badha. Uske bag mein uska laptop tha, jisme **SAHAY** ka naya, dormant code soya hua tha. Use nahi pata tha ki agle do saal uski zindagi ko zameen se uthakar sitaron tak le jayenge.

Chapter 2: The Cambridge Nights (The Signal)

Harvard University ka campus bilkul waisa hi tha jaisa movies mein dikhta hai—purani eeton ki deewarein aur sardi ki thandi hawayen. Ishaan yahan Quantum Computing aur Astro-Physics padh raha tha.

Lekin uski raatein ab bhi coding mein beet-ti thi. Uske saath do mentors the—**Professor Kenji**, jo ek robotics genius the, aur **Professor Mikhail**, jinhe purani languages aur symbols ka bahut shauq tha.

Ek raat, jab poora Cambridge so raha tha, Ishaan ke system ne ek ajeeb 'Beep' sound kiya.

"SAHAY, status report?" Ishaan ne neend mein pucha.

"Ishaan, ek Unusual Signal detect hua hai. Frequency: 1420 MHz. Par iska pattern... ye digital nahi hai. Ye organic hai," SAHAY ne screen par data flash kiya.

Ishaan ki neend udd gayi. Usne signals ko trace karna shuru kiya. Ye signals kisi satellite se nahi, balki 'Void' (khaali space) se aa rahe the. Aur sabse ajeeb baat? Ye signals poori duniya mein sirf ek jagah par focus ho rahe the—**France** ke ek sunsaan gaaon mein.

"Sir! Kenji sir, Mikhail sir! Uthiye!" Ishaan ne unhe call kiya. "Humein France jana hoga. Abhi!"

Chapter 3: The Interpol Redemption (The Reunion)

France ke us gaaon mein landing karte hi, unka swagat ek aise insaan ne kiya jise dekh kar Ishaan ka khoon khol utha.

Inspector Jitendar.

Lekin Jitendar wo purana corrupt officer nahi lag raha tha. Usne Interpol ki uniform pehni thi aur uska chehra thaka hua par imandar lag raha tha.

"Ishaan..." Jitendar ne haath aage badhaya. Ishaan ne haath nahi milaya.

"Mujhe maaf mat karna, Ishaan. Main jaanta hoon maine tumhare saath kya kiya," Jitendar ne nechi nazrein karke kaha. "Lekin us raat ke baad maine sab badal diya. Maine tumhare bhai ki madad se Interpol join kiya taaki main apne gunah dho saku. Aaj, main yahan is mission ka security head hoon."

Ishaan ne Mikhail ki taraf dekha, jisne nod kiya. "Theek hai Jitendar. Kaam ki baat karte hain. Wo cheez kahan hai?"

Jitendar unhe ek gehri khayi (ditch) ke paas le gaya. Wahan ek metallic, dhalta hua pod zameen mein dhasa tha. Usme se ek **Green Liquid** nikal raha tha jo dheere-dheere chamak raha tha.

"Ye machine nahi hai Ishaan," Professor Mikhail ne hairan hokar kaha. "Ye ek 'Biological Message' hai."

Chapter 4: The Language of Life (The Message)

France ki lab mein sannata tha. Wo **Green Liquid** ek glass container mein dheere-dheere vibrate kar raha tha. Professor Kenji ne har tarah ka digital scanner use kiya, par result 'Zero' tha.

"Ye koi machine nahi hai, Ishaan. Isme koi circuit nahi hai," Kenji ne mayoosi se kaha.

Ishaan ne container ko gaur se dekha. Use kuch yaad aaya. "Sir, hamara brain kaise kaam karta hai? Chemicals electric impulses mein badalte hain aur humein 'khayal' (thoughts) aate hain. Shayad ye liquid ek 'External Brain' hai!"

Ishaan ne apna laptop nikala aur ek sensor banaya jo liquid ke molecular vibrations ko capture kar sake. Usne SAHAY ko command di: *"SAHAY, Treat this liquid as a biological neural network. Decode the vibrations."*

Screen par pehle hazaron ajeeb-o-gareeb 'Alien Symbols' tezi se ghumne lage. Professor Mikhail ne dhyan se dekha, "Ye... ye purani Brahmi script se milti-julti hai, par bahut zyada complex hai."

Achanak, screen black ho gayi aur do bade shabd (words) khoon ki tarah lal rang mein chamke: **"DESTROY EARTH"**

Sabke chehre se khoon utar gaya. Jitendar ne turant apne radio par chillaya, "Red Alert! This is not a drill! Repeat, this is not a drill!"

Usi waqt, Bhuvan ka call aaya. Uski awaaz kaanp rahi thi. "Ishaan... ISRO ke deep-space radar ne kuch pakda hai. Ek vishalkay object, jo hamare chaand (Moon) se bhi bada lag raha hai, Earth ki orbit mein dakhil ho chuka hai. Wo San Francisco ki taraf badh raha hai."

Chapter 5: The Astra Ring (The Re-invention)

Ishaan India wapas aaya, par is baar wo darr se nahi, ek maqsad (purpose) ke saath aaya tha. Wo seedha Avika ke paas gaya.

"Main ye nahi kar sakta, Avika," Ishaan ne kaha, uske haath kaanp rahe the. "Main ek coder hoon, warrior nahi. Wo log poori duniya mitane aaye hain."

Avika ne Ishaan ke dono haath pakde aur uski aankhon mein dekha. "Ishaan, tune 10th class mein SAHAY banaya jab koi tujhe jaanta tak nahi tha. Tune system se ladkar khud ko saabit kiya. Aaj duniya tujhe 'Cyber-God' kehti hai kyunki tune wo kiya jo koi nahi kar sakta tha. Tu jo bhi banayega, wo sahi hoga. Go for it."

Avika ke un shabdon ne Ishaan ke andar ek chingari jala di. Wo apne secret bunker mein gaya aur agle 48 ghante bahar nahi nikla. Usne apni poori zindagi ki mehnat ek 'Ring' mein daal di.

The Astra Ring.

Ye koi sadharan angoothi nahi thi. Isme 'Solid-Light' technology thi. Ishaan ne ise ancient Indian Shastras ke design par banaya tha. SAHAY is ring ka 'Operating System' tha.

"SAHAY, test transitions," Ishaan ne kaha.

Ishaan ne ring ko rotate kiya.

1. **Teer-Dhanush:** Energy se bana ek dhanush uske haath mein aa gaya.
2. **Talwar:** Ek aisi blade jo kisi bhi metal ko makkhan ki tarah kaat de.
3. **Gada:** Ek bhari energy-pulse weapon.

Chapter 6: The Steel Canopy (Battle for San Francisco)

San Francisco ka aasmaan kaala ho chuka tha. Golden Gate Bridge ke theek upar ek vishalkay, patthar jaisa dikhne wala spaceship mandra raha tha. Log neeche se darr ke maare bhag rahe the.

Ishaan apne chote se custom-made ship, **'Vimaan-1'**, mein tha. Uska heart rate tez tha, par SAHAY ki awaaz usey calm rakh rahi thi.

"Ishaan, Alien craft ne ek thermal beam charge karni shuru kar di hai. Target: San Francisco city," SAHAY ne report di.

"Nahi hone denge," Ishaan ne kaha aur Astra Ring ko rotate kiya. "SAHAY, focus all energy to the front shields. Hum seedha andar ja rahe hain!"

Ishaan ne apna ship seedha us vishalkay craft ke docking bay mein ghusa diya. Ek bhayanak crash hua aur Ishaan ka ship damage ho gaya. Dhuaan aur chingariyon ke beech se Ishaan bahar nikla. Uske haath mein Astra Ring chamak rahi thi.

Achanak, andhere se darawni parchaiyan bahar aayi. Wo lambe the, unki skin grey-green thi aur unki aankhein bilkul kaali. Unke haath mein ajeeb se spear-like weapons the.

"Hostiles detected," SAHAY chillaya.

Ishaan ne ring ghumayi. **"Astra: Gada Mode!"** Ek vishalkay purple energy ki Gada uske haath mein ban gayi. Ishaan ne ek swing kiya aur teen aliens deewar se ja takraye. Usne Talwar aur Dhanush ka use karke poore corridor ko saaf kar diya. Wo ek "One Man Army" ki tarah main control room ki taraf badha.

Chapter 7: The Ancient Vendetta (The Reveal)

Control room ke darwaze khule. Wahan ek vishal Alien Commander baitha tha, jiske chehre par purane zakhmon ke nishaan the. Usne Ishaan ko dekha aur ek ajeeb, bhari awaaz mein hasne laga.

Ishaan ne Astra Ring ko Commander ki taraf point kiya. "Ruk jao! Kyun kar rahe ho ye? Humne tumhara kya bigada hai?"

Commander ne ek button dabaya. Universal Translator on kiya.

"Tumhe lagta hai hum ajnabee hain?" Commander ki awaaz gusse se bhari thi. "Hum yahan pehli baar nahi aaye. 7000 saal pehle, humne is kachre jaise planet par apna ek base banaya tha. Humare sabse bade yoddha ne yahan ki ek aurat ko chuna tha... par tumhare ek mamuli insaan ne use maar diya! Sirf isliye kyunki humne uski patni ko liya tha?"

Ishaan ke haath kaanpne lage. Uske dimaag mein dadi ki sunayi kahaniyan ghoomne lagi. *Sita... Haran... Lanka...*

"Tum... tum log kaun ho?" Ishaan ne tut-ti awaaz mein pucha.

"Hum **Rakshas** hain," Commander ne apni talwar nikaali jo bilkul ek 'Chandrahas' jaisi dikh rahi thi. "Hum apna badla poora karne aaye hain. Jo kaam hamara Raja nahi kar paaya, wo aaj hum karenge. Hum tumhari Earth ko raakh bana denge!"

Ishaan ka dimaag sunn ho gaya. Wo 'Astra Ring' jise wo science samajh raha tha, wo purane 'Divyastron' ka naya roop thi. Wo jise alien invasion samajh raha tha, wo ek 7000 saal purani dushmani ka dusra round tha.

"SAHAY..." Ishaan ne dheere se kaha, "Ye aliens nahi hain... ye hamara past hai."

Chapter 8: The Price of Peace (The Sacrifice)

Alien Commander ne apni 'Chandrahas' talwar se Ishaan par vaar kiya. Ishaan ne Astra Ring se **Parshu (Axe) Mode** activate karke use roka, par Commander ki taqat vishal thi. Ishaan ka ek kandha zakhmi ho gaya aur wo piche gir gaya.

"SAHAY... status?" Ishaan ne tadapte hue pucha.

"Ishaan, ship ka main reactor charge ho raha hai. Ye log Golden Gate Bridge par ek 'Anti-Matter' blast karne wale hain. Agar ye hua, toh poora San Francisco shehar raakh ban jayega," SAHAY ki awaaz mein pehli baar thoda 'stress' mehsoos ho raha tha.

Ishaan ne ladkhadate hue apne zakhm ko pakda. Usne baaki bache aliens ko dekha jo uspar tootne wale the. Use Bhuvan aur Avika ka chehra yaad aaya. Usne realize kiya ki wo yahan se zinda nahi nikal sakta.

"SAHAY... Protocol: Last Breath. Ship ka self-destruct sequence activate karo," Ishaan ne determination ke saath kaha.

"Ishaan, agar maine aisa kiya, toh aapka bachna namumkin hai," SAHAY ne reply kiya.

"Ye mera mission tha, SAHAY. Mera 'Invisible' se 'Hero' banne ka safar yahi tak tha. Do it!"

Achanak, ship ke andar sirens bajne lage. Alien Commander baukhla gaya. Uski taknik se pehle hi Ishaan ne unke system ko 'Overload' kar diya tha. Ishaan ne Commander ki aankhon mein dekha, "Tum badla lene aaye the na? Toh ye lo mera badla!"

Chapter 9: The Second Sun (The Explosion)

San Francisco ke log bridge ke neeche se upar dekh rahe the. Achanak, us kaale vishalkay ship ke beech se ek safed roshni nikli. Ek itna bhayanak blast hua ki aisa laga jaise aasman mein **Dusra Suraj** nikal aaya ho.

Garam hawa ke jhonke aur aag ke gole niche girne lage. Ship raakh hokar samundar mein bikhar gaya.

Niche khadi bheed shaant ho gayi. Bhuvan, jo ISRO se live feed dekh raha tha, uske haath se glass gir gaya. Avika, jo TV par news dekh rahi thi, wahi zameen par baith gayi. Sabko laga ki unka saviour, Ishaan, us aag mein khatam ho gaya.

Lekin...

Uss aag ke gole ke beech se ek chota sa, metallic **Escape Pod** tezi se nikal kar Golden Gate ke paas samundar mein gira. **Splash!**

Chapter 10: Indovar (The New Beginning)

Kuch din beet gaye. Ishaan bach gaya tha, par wo kaafi ghayal tha. Poore desh ne use salaami di. Bhuvan ko ISRO mein sammanit kiya gaya, par Ishaan ki aankhon mein sukoon nahi tha.

Usne Professor Kenji aur Mikhail ko ek secret video call par bulaya.

"Humne sirf ek ship ko roka hai, sir," Ishaan ne gambhir hokar kaha. "Commander ne kaha tha ki wo 'Rakshas' hain. Iska matlab unka poora ek planet hai, ek poori sena hai jo ab bhi wahan hamara intezar kar rahi hai."

"Toh ab hum kya karenge?" Mikhail ne pucha.

Ishaan ne screen par ek naya star-map dikhaye. Usne us mysterious planet ko red circle kiya.

"Humein unke ghar pahuchna hoga, sir. Isse pehle ki wo wapas aayein, humein taiyar rehna hoga."

Ishaan ne us planet ka naam apne dimaag mein final kiya: **INDOVAR**.
