Chapter 1: The Unknown Signal

Do saal.

Do saal mein bahut kuch badal jaata hai — aur bahut kuch waise hi rehta hai.

Ishaan ka kamra wahi tha. Wahi laptop, wahi ceiling fan, wahi khidki jisse subah ki pehli roshni aati thi. Par us kamre mein baithne wala ladka badal gaya tha — thoda. Andar se.

12th ke boards mein uske marks achhe aaye the — bahut achhe. Par is baar koi media nahi aayi thi. Koi mohalla terrace par nahi chada tha. Kyunki AIR 1 ke baad koi bhi number chota lagta hai — logon ke liye. Ishaan ke liye nahi. Ishaan ke liye ye uski apni mehnat ka natija tha — bas itna.

SAHAY restrict tha. Dormant. Par tha.

Zindagi chal rahi thi — seedhi, shant.

Phir ek din letter aaya.

Saadharan envelope. Harvard University ka logo. Full scholarship — Quantum Computing aur Astrophysics.

Ishaan ne use teen baar padha. Phir Mummy ko dikhaya.

Mummy ne padha. Haath mein karchi thi — rasoi se seedha aayi thi. Unhone letter neeche rakha. Aankhein bhar aayi.

"Ja beta," unhone dheere se kaha. "Jaa aur duniya dekh."

Airport par Bhuvan sabse pehle tha.

Usne Ishaan ko dekha aur seedha aage aaya — koi bada moment nahi — bas zor se gale lagaya.

"Dhyan rakhna chhote," Bhuvan ne kaha. Awaaz thodi bhaari thi. "Wahan ke log tere dimaag ka fayda uthayenge — par tu unhe apna dil mat dena."

"Bhai, mera dil toh ab bhi wahi pichli seat par chhoota hua hai."

Bhuvan hans diya — aankhein bhari hone ke bawajood.

Avika aayi — confident, seedhi — par awaaz thodi kaanp rahi thi.

"All the best Ishaan. Kabhi kabhi purane doston ko call bhi kar lena."

"Call karunga. Scooty kaisi chal rahi hai?"

Avika khilkhila kar hans padi. "Bilkul makkhan! Jao ab — flight miss ho jayegi."

Ishaan boarding gate ki taraf badha. Ek baar peeche dekha — Bhuvan aur Avika wahan khade the. Dono ne haath hilaya.

Ishaan muskuraya. Muda. Chala gaya.

Harvard ka campus bilkul waisa hi tha jaisa movies mein dikhta hai — purani eenton ki deewarein, sardi ki thandi hawayen. Par Ishaan ke liye ye sirf ek naya sheher tha — naya kamra, naya routine.

Yahan do log the jo us routine ka hissa bane.

Professor Kenji — robotics genius, Japanese, uski aankhon mein ek pita jaisi fikr thi jo Ishaan ko pehle din se mehsoos hui. Wo Ishaan ko physics nahi, zindagi sikhata tha — bina bataye.

Professor Mikhail — Russian scientist, sharp blue eyes, purani languages aur symbols ka junoon. Wo kam bolti thi par jab bolti thi toh log sunte the. Uske kaam karne ka tarika bilkul precise tha — koi extra word nahi, koi extra movement nahi.

Teeno ki ek ajeeb si team bani — teen alag duniyaon ke log, ek hi lab mein.

Raatein Cambridge mein thandi hoti thi. Ishaan ka routine wahi tha — din mein class, raat mein coding. SAHAY dormant tha par Ishaan ne usse kabhi delete nahi kiya. Kabhi kabhi raat ko us interface ko dekhta rehta — jaise kisi purane dost ki photo dekhte hain.

Ek raat — poora Cambridge so raha tha — Ishaan ke system ne ek ajeeb si beep ki.

Usne screen dekhi. SAHAY ne apne aap activate kiya tha — sirf itna ki ek alert de sake.

"SAHAY? Kya hua?"

"Ishaan, ek unusual signal detect hua hai." SAHAY ki awaaz halki thi — jaise bahut door se aa rahi ho. "Frequency: 1420 MHz. Par iska pattern digital nahi hai. Ye organic hai. Aur ye kisi satellite se nahi aa raha — ye void se aa raha hai. Khaali space se."

Ishaan seedha ho gaya. Neend poori tarah gayi.

"Kahan focus ho raha hai signal?"

"Sirf ek jagah par poori duniya mein." Ek pause. "France. Ek sunsaan gaon."

Ishaan ne screen ko dekha. Data stream chal rahi thi — ajeeb patterns, organic vibrations, kuch aisa jo usne pehle kabhi nahi dekha tha.

Usne ghadi dekhi — raat ke teen baje. Bahar Cambridge ki thandi khamoshi thi.

"Sir!" Usne Kenji ko call kiya. "Mikhail ma'am ko bhi jagao. Humein France jana hoga. Abhi."

Chapter 2: The Liquid

France ka wo sunsaan gaon bilkul alag hi tha.

Sheher ki raunak nahi thi wahan — bas purane patthar ke makaan, thandi hawa, aur ek aisi khamoshi jo andar tak mehsoos hoti thi. Ishaan, Kenji aur Mikhail teen alag flights se aaye the — teeno ke chehron par thakaan thi par aankhon mein ek ajeeb si urgency.

Gaon ke bahar ek sunsaan rasta tha. Raste ke kinare ek gehri khayi thi.

Aur us khayi mein — zameen mein dhasa hua — ek metallic pod tha.

Woh purana nahi tha. Woh kisi factory mein nahi bana tha. Uski surface par koi bolt nahi tha, koi welding ka nishaan nahi tha. Jaise kisi ne use ek hi cheez se bana diya ho — ek hi material, ek hi shape. Usmein se ek gehra hara liquid nikal raha tha — dheere dheere, ek patli dhaar mein — jo zameen mein sama raha

tha. Jahan bhi wo liquid gira tha, zameen ka rang thoda alag tha — gehra, jaise zameen kuch absorb kar rahi ho.

"Ye machine nahi hai," Mikhail ne jhuk kar dekha. Uski sharp blue aankhein pod ki surface par tikki thi. "Isme koi circuit nahi. Koi wiring nahi."

"Toh ye hai kya?" Kenji ne pucha.

Koi jawab nahi tha — abhi ke liye.

Tabhi wahan ek aur insaan tha.

Ishaan ne pehchana — aur ek pal ke liye uska khoon thanda ho gaya.

Inspector Jitendar.

Par ye wo Jitendar nahi tha. Pressed Interpol uniform. Thaka hua par imandar chehra. Wo purani corrupt muskaan nahi thi — wahan ab sirf ek aadmi tha jo apne gunah dhoke ki koshish kar raha tha.

"Ishaan..." Jitendar ne haath aage badhaya.

Ishaan ne haath nahi milaya. Bas dekha.

"Mujhe maaf mat karna," Jitendar ne nechi nazrein karke kaha. "Par us raat ke baad maine sab badal diya. Bhuvan bhai ki madad se Interpol join kiya. Aaj main is mission ka security head hoon."

Ishaan ne Mikhail ki taraf dekha. Usne dheere se nod kiya — confirm kiya.

Ishaan ne ek gehri saans li. "Theek hai Jitendar. Kaam ki baat karte hain."

France ki lab mein kaam shuru hua.

Green liquid ko ek specially sealed glass container mein rakha gaya tha. Wo dheere dheere vibrate kar raha tha — bilkul regular intervals par — jaise koi saans le raha ho.

Kenji ne har tarah ka digital scanner use kiya. Electromagnetic, infrared, X-ray — sab ka result zero tha.

"Ye koi machine nahi hai Ishaan," Kenji ne mayoosi se kaha. "Isme koi circuit nahi hai, koi signal transmitter nahi. Main kuch nahi pakad pa raha."

Ishaan container ke saamne baitha tha — ghanton se. Sirf dekh raha tha. Soch raha tha.

Mikhail coffee lekar aayi aur Ishaan ke paas baith gayi. "Kuch dikh raha hai?"

"Haan," Ishaan ne kaha. "Par samajh nahi aa raha abhi."

Wo liquid vibrate kar raha tha. Regular. Rhythmic. Jaise...

Jaise dhadkan.

Ishaan seedha ho gaya.

"Mikhail ma'am, ek sawaal — humara brain kaise kaam karta hai?"

Mikhail ne thodi hairani se dekha. "Chemicals electric impulses mein badalte hain. Neurons fire karte hain. Thoughts aate hain."

"Exactly," Ishaan ne container ki taraf ishaara kiya. "Ye liquid bhi waise hi vibrate kar raha hai — chemical molecular pattern mein. Ye koi machine nahi hai. Ye ek External Brain hai. Ye socha hai. Ye message hai — biological format mein."

Kamre mein sannata chha gaya.

"Matlab..." Kenji ne dheere se kaha.

"Matlab isko digital scanner se nahi padha ja sakta," Ishaan ne laptop nikala. "Isko neural network ki tarah treat karna hoga."

Usne SAHAY ko activate kiya.

"SAHAY, ye liquid ek biological neural network hai. Iske molecular vibrations capture karo aur decode karo — jaise tum human emotional patterns decode karte ho."

"Samajh gaya," SAHAY ne kaha. "Processing..."

Screen par pehle kuch nahi aaya. Phir dheere dheere — hazaron ajeeb symbols — tezi se ghumne lage. Koi language nahi thi jo Ishaan ne pehle dekhi ho. Par pattern tha — clear, organized.

Mikhail screen ke paas aayi. Usne symbols ko gaur se dekha — aur uski aankhein badi ho gayi.

"Ye... ye kisi purani Brahmi script se milti julti hai," usne dheere se kaha. "Par bahut zyada complex. Jaise Brahmi ka ek advanced version ho — hazaron saal aage."

SAHAY processing karta raha. Symbols tez hote gaye. Phir dheere. Phir—

Screen black ho gayi.

Ek pal ki khamoshi.

Phir — do bade, laal, chamakte hue words:

"DESTROY EARTH"

Kamre mein koi nahi hila. Koi nahi bola.

Jitendar ne jo pehla kaam kiya wo apna radio uthana tha. "Red Alert! This is not a drill! Repeat — this is not a drill!"

Kenji ki aankhein screen par tiki thi. Mikhail ne apni coffee ka cup neeche rakha — haath thoda kaanp raha tha.

Ishaan ne sirf screen ko dekha. Do words. Itne saaf. Itne final.

Tabhi Bhuvan ka call aaya. Uski awaaz kaanp rahi thi.

"Ishaan... ISRO ke deep space radar ne kuch pakda hai. Ek vishalkay object — hamare chaand se bhi bada — Earth ki orbit mein dakhil ho chuka hai. Wo San Francisco ki taraf badh raha hai."

Ishaan ne phone haath mein pakde rakha.

Bahar France ki thandi hawa thi. Andar lab mein wo do words abhi bhi screen par the.

DESTROY EARTH.

Chapter 3: The Support

India wapas aana ek alag hi tarah ka tha.

Pehle jab Ishaan India aaya tha — AIR 1 ke baad — toh duniya usse dekhna chahti thi. Is baar duniya usse blame karna chahti thi. News channels par experts baith ke bata rahe the ki ye alien signal Earth tak kyun pahuncha — aur har baar jawab mein ek hi naam aata tha.

Ishaan Kumar Singh.

"Ye log keh rahe hain ki tumhari research ne unhe attract kiya," Kenji ne flight mein dheere se kaha.

"Main jaanta hoon," Ishaan ne khidki ke bahar dekha. Neeche baadal the — safed, shant. Upar kuch nahi tha — sirf neela aasmaan. Kahin wahan — hazaron kilometer door — ek vishalkay alien ship thi jo seedha aa rahi thi.

"Darr lag raha hai?" Mikhail ne poochha.

Ishaan ne ek pal socha. "Haan. Par darr aur rukna alag alag cheezein hain."

India aate hi Ishaan lab nahi. Office nahi. Seedha Avika ke paas.

Usne use sab bataya — pod, green liquid, DESTROY EARTH, alien ship. Avika chup chaap sunti rahi. Jab Ishaan khatam hua toh ek khamoshi thi — par wo khamoshi darr ki nahi thi.

"Ishaan," Avika ne uske dono haath pakde. "Tu jab 10th mein tha tab SAHAY banaya tha — jab koi tujhe jaanta tak nahi tha. Tune system se ladkar khud ko saabit kiya. Poori duniya tujhe 'Cyber-God' kehti hai kyunki tune wo kiya jo koi nahi kar sakta tha." Usne seedha uski aankhon mein dekha. "Jo bhi tu banayega — wo sahi hoga. Ja. Kar."

Ishaan ne ek gehri saans li.

Wahi ek pal kaafi tha.

Usne apna secret bunker khola — wo jagah jo sirf uski thi. Andar SAHAY ka purana setup tha, kuch purane tools the, aur ghanton ki khamoshi thi.

Ishaan andar gaya. Darwaza band kiya.

48 ghante bahar nahi nikla.

48 ghante baad darwaza khula.

Ishaan ke baal bikhre hue the. Aankhon mein neend nahi thi. Haath mein grease thi. Par chehre par ek aisi shanti thi jo tab aati hai jab koi insaan apni poori taqat ek cheez mein jhonk deta hai.

Uske haath mein thi — **The Astra Ring.**

Woh koi sadharan angoothi nahi thi. Dhatu aur solid-light technology ka ek kamaal — ancient Indian Shastras ke design par banaya hua. SAHAY uska operating system tha. Rotate karo — weapon badal jaata hai.

"SAHAY, test transitions," Ishaan ne kaha.

Ring ghumi.

Pehle — **Teer Dhanush**. Energy se bana ek dhanush — neeli roshni, tight string, perfect balance.

Doosra — **Talwar**. Ek aisi blade jo kisi bhi metal ko makkhan ki tarah kaat de.

Teesra — **Gada**. Ek bhari energy pulse weapon — ek swing mein deewar tod de.

"Impressive," SAHAY ne kaha. "Par Ishaan — ye kafi nahi hoga. Tum akele us ship mein nahi ja sakte."

"Akele nahi ja raha."

Usne Kenji aur Mikhail ko bulaya. Bhuvan ISRO se already connect tha.

Lab mein charon baithe screen par alien ship ka data dekh rahe the. Ship San Francisco ke upar thi — abhi tak koi attack nahi hua tha, par ship ki position threatening thi. Jaise wo wait kar rahi thi.

"Humein andar jaana hoga," Ishaan ne kaha.

"Kaise?" Kenji ne poochha. "Unka ship hamare chaand se bada hai."

"Isliye seedha andar ghuseinge — unke docking bay mein." Ishaan ne ek design screen par khola. "Iske liye ek aisi ship chahiye jo tez ho, small ho, aur unke radar ko dodge kar sake."

Mikhail ne design ko gaur se dekha. "Ye possible hai. Par itni tez ship banane mein waqt lagega."

"Nahi lagega," Ishaan ne kaha. "Kyunki maine pehle se design kar li hai."

Usne ek aur file kholi.

Vimaan-1.

Woh choti thi — sirf ek ke liye — par uski body par ek special reflective coating thi jo radar ko confuse karti thi. Engine compact tha par powerful. Aur sabse important — uski speed.

"48 ghante mein banegi," Ishaan ne kaha.

"48 ghante?" Bhuvan ne hairani se poochha.

"Haan. Tum sab help karoge."

Kenji ne ek baar Mikhail ki taraf dekha. Mikhail ne kandhe uchkaye — ek halki si muskaan ke saath.

"Theek hai," Kenji ne kaha. "Batao kya karna hai."

48 ghante ki mehnat.

Koi so nahi raha tha. Koi ruk nahi raha tha. Chai thandi ho jaati thi — koi peeta nahi tha. Khaana table par dhara rehta tha — koi uthata nahi tha.

Sirf kaam. Sirf ek maqsad.

Bhuvan aur Ishaan engine par the. Kenji sensors par. Mikhail coating laga rahi thi — haath mein chemical gloves, chehra mask se dhaka.

Beech beech mein choti choti baatein hoti thi — sirf itni jitni zaruri hoti thi.

"Wire left side se nikaalo."

"Sensor calibrate ho gaya."

"Coating dry hone mein aur ek ghanta."

Aur phir — 48 ghante baad — Vimaan-1 taiyar thi.

Woh chhoti thi. Sleek thi. Uski body par chamak thi — ek aisi chamak jo space mein mili nahi jaati.

Charon ne use ek pal dekha.

Koi bada dialogue nahi tha. Koi emotional speech nahi thi.

Bas ek nazar — aur sab samajh gaye ki ab kya hona hai.

Chapter 4: Our Past

San Francisco ka aasmaan kaala ho chuka tha.

Golden Gate Bridge ke theek upar — itna bada ki uski chhaya poore sheher par thi — ek vishalkay alien ship mandra rahi thi. Patthar jaisi surface, koi roshni nahi, koi awaaz nahi. Bas ek bhari maujoodgi — jaise aasmaan khud kuch keh raha ho.

Neeche log bhaag rahe the. Gaadiyaan ruk gayi thi. Koi direction nahi tha — bas darr tha.

Vimaan-1 ek choti si dot ki tarah us vishalkay ship ke saamne thi.

Ishaan cockpit mein akela tha. SAHAY active tha. Astra Ring kalai par thi.

"SAHAY, unka docking bay kahan hai?"

"Left side — section 7. Par Ishaan, unke sensors active hain. Agar hum seedha—"

"Seedha andar ghusenge," Ishaan ne kaha. "Reflective coating kaam karegi. Bharosa rakho."

Bahar Bhuvan ISRO se live feed dekh raha tha. Kenji aur Mikhail bunker mein the — screens par data dekh rahe the, kuch kar nahi sakte the — bas dekh sakte the.

"Ishaan — communication channel open rakho," Kenji ne earpiece mein kaha. "Hum yahan hain."

"Hamesha," Ishaan ne dheere se kaha.

Phir usne ship seedha alien craft ki taraf badhaayi.

Docking bay mein entry ke waqt ek bhayanak crash hua.

Vimaan-1 damage ho gayi — ek taraf jhuk gayi, engine se dhuaan nikal raha tha. Chingariyan chhoot rahi thi.

Ishaan pehle nikla. Astra Ring activate ki.

Andhera tha — gehri, bhari tarah ka andhera. Alien ship ke andar ki hawa alag thi — thodi bhaari, thodi ajeeb. Jaise kisi aur duniya ki saans thi ye.

"SAHAY, scan karo."

"Multiple hostiles. Left corridor. Aa rahe hain."

Andhere se parchaiyan nikli — lambe, grey-green skin, kaali aankhein. Unke haath mein ajeeb se weapons the — spear jaisi cheezein jo energy se chamak rahi thi.

"Hostiles detected," SAHAY ne confirm kiya.

Ishaan ne ring ghumayi. "Astra — Gada Mode."

Ek purple energy ki Gada uske haath mein ban gayi. Ishaan ne ek swing kiya — teen aliens deewar se ja takraye. Usne Talwar mode mein switch kiya — ek neeli chamak — corridor clear ho gaya.

Woh aage badha — ek ke baad ek section — Astra Ring ke teen modes use karte hue. Akela tha — par ruk nahi raha tha. Andar se darr tha — par pair aage badh rahe the.

Earpiece mein Kenji ki awaaz aayi — "Ishaan, right side se aur aa rahe hain—"

"Dekh liya," Ishaan ne kaha aur Dhanush mode activate kiya. Ek energy arrow ne puri row saaf kar di.

Control room ke darwaze khule.

Ek vishalkay Commander baitha tha — uske chehre par purane zakhmon ke nishaan the. Usne Ishaan ko dekha aur ek bhaari, ajeeb awaaz mein hansne laga.

Ishaan ne Astra Ring Commander ki taraf point ki. "Ruk jao. Kyun kar rahe ho ye? Humne tumhara kya bigada hai?"

Commander ne ek button dabaya — Universal Translator.

"Tumhe lagta hai hum ajnabee hain?" Commander ki awaaz gusse se bhari thi. "Hum yahan pehli baar nahi aaye. 7000 saal pehle humne is planet par apna base banaya tha. Humare sabse bade yoddha ne yahan ki ek aurat ko chuna tha — par tumhare ek insaan ne use maar diya. Sirf isliye kyunki humne uski patni ke taraf dekha tha."

Ishaan ke haath dheere dheere neeche aaye.

Uske dimaag mein kuch ghoomne laga — dadi ki sunayi kahaniyan. Raat ke waqt, purani awaaz mein, baar baar sunai di thi ye kahani.

Sita. Haran. Lanka.

"Tum... tum log kaun ho?" Ishaan ne tut-ti awaaz mein poochha.

Commander ne apni talwar nikaali — bilkul ek Chandrahas jaisi.

"Hum Rakshas hain," usne kaha. "Hum apna badla poora karne aaye hain. Jo kaam hamara Raja nahi kar paaya — wo aaj hum karenge."

Ishaan ka dimaag sunn ho gaya.

Wo jise alien invasion samajh raha tha — wo 7000 saal purani dushmani ka doosra round tha.

"SAHAY..." Ishaan ne dheere se kaha. "Ye aliens nahi hain. Ye hamara past hai."

Earpiece mein khamoshi thi. Kenji, Mikhail, Bhuvan — teeno ne suna. Koi jawab nahi aaya.

Kuch baatein itni badi hoti hain ki unka jawab nahi hota

Chapter 5: Second Sun

Commander ne apni Chandrahas talwar se Ishaan par vaar kiya.

Ishaan ne Astra Ring se Parshu Mode activate kiya — ek bhaari energy axe — use roka, par Commander ki taqat vishal thi. Ishaan ka ek kandha zakhmi ho gaya aur wo piche gir gaya.

"SAHAY... status?" Ishaan ne tadapte hue poochha.

"Ishaan, ship ka main reactor charge ho raha hai. Wo Golden Gate Bridge par ek Anti-Matter blast karne wale hain. Agar ye hua — poora San Francisco raakh ban jaayega."

Ishaan ne ladkhadate hue apne zakhm ko pakda. Usne baaki bache aliens ko dekha jo uspar tootne wale the. Use Bhuvan ka chehra yaad aaya. Avika ka chehra yaad aaya. Kenji. Mikhail.

Aur phir usne realize kiya — wo yahan se zinda nikalna aur san fransisco bachana Dono ek saath nahi ho sakte.

Ek ko chunna tha.

Ishaan ne apni aankhein band ki. Ek pal.

Phir kholi.

"SAHAY..." uski awaaz shant thi — bilkul shant. "Protocol: Last Breath. Ship ka self-destruct sequence activate karo."

"Ishaan, agar maine aisa kiya toh aapka bachna namumkin hai."

"Ye mera mission tha SAHAY. Mera 'Invisible' se 'Hero' banne ka safar yahi tak tha. Ek pause. "Do it."

Ship ke andar sirens bajne lage. Red lights flash karne lagi. Commander baukhla gaya — uski taknik se pehle hi Ishaan ne unke system ko Overload kar diya tha.

Commander ne Ishaan ki taraf dekha — gusse mein, hairani mein.

Ishaan ne uski aankhon mein dekha. "Tum badla lene aaye the na? Toh ye lo mera badla."

San Francisco ke log bridge ke neeche se upar dekh rahe the.

Achanak, us kaale vishalkay ship ke beech se ek safed roshni nikli — itni tez, itni bhaari ki aankhein band ho gayi. Ek bhayanak blast hua — aisa laga jaise aasmaan mein Doosra Suraj nikal aaya ho.

Garam hawa ke jhonke neeche aaye. Aag ke gole girne lage. Ship raakh hokar samundar mein bikhar gayi.

Neeche ki bheed shaant ho gayi.

ISRO mein Bhuvan ki screen par sab kuch black ho gaya. Uske haath se glass gir gaya. Woh wahan ka wahan khada raha — screen ko dekhta raha — jaise agar kaafi der dekha toh kuch alag dikhega.

Bunker mein Kenji ne Mikhail ka haath pakda. Mikhail ki aankhein band thi.

Koi kuch nahi bol raha tha.

Phir —

Uss aag ke gole ke beech se ek chota sa metallic Escape Pod tezi se nikal kar Golden Gate ke paas samundar mein gira.

Splash.

Kuch din baad.

Ishaan bach gaya tha — kaafi ghayal, par zinda. Poore desh ne use salaami di. Headlines mein uska naam tha. Log sadkon par the.

Par Ishaan ki aankhon mein sukoon nahi tha.

Usne Professor Kenji aur Mikhail ko ek secret video call par bulaya. Bhuvan bhi tha.

"Humne sirf ek ship ko roka hai," Ishaan ne gambhir hokar kaha. "Commander ne kaha tha ki wo Rakshas hain — ek poora planet hai unka. Ek poori sena hai jo ab bhi wahan hai."

Kamre mein khamoshi.

"Toh ab kya karenge?" Mikhail ne poochha.

Ishaan ne screen par ek naya star map dikhaya. Usne us mysterious planet ko red circle kiya.

"Humein unke ghar pahunchna hoga. Isse pehle ki wo wapas aayein — humein taiyar rehna hoga."

Usne us planet ka naam apne dimaag mein final kiya.

INDOVAR.
